THE SCIENCE OF FABRIC

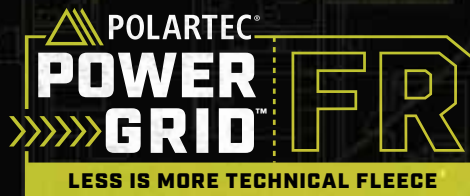

CONSTRUCTED FOR COMFORT

BUILT TO LAST

We knit our patented tri-blend yarn into inherently flame-resistant, temperature-regulating fabrics. This means FR protection is built directly into the fiber for fabrics that **feel better, fit better,** and **guarantee FR performance for the life of the garment.**

This patented Westex tri-blend knit sets a new standard in next-to-skin fabric, as it promotes efficient moisture wicking to quickly move sweat away from the body and decrease dry times.

Our grid construction knit strengthens performance by increasing warmth and breathability, while reducing fabric mass.

This tighter knit construction reduces wind chill and repels moisture while retaining breathability and comfort.

POWER DRY® FR

STYLE	DESCRIPTION	CONTENT	NFPA 70E PPE CATEGORIES	NFPA 2112 CERTIFIED	CUTTABLE WIDTH	SPEC WEIGHT oz/yd² (g/m)	LAUNDRY	TYPICAL GARMENT APPLICATIONS
